*Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 9-14, drawn to a method for manufacturing an ink-jet head, classified in class 29, subclass 25.35.
- II. Claims 1-8, drawn to an ink-jet head, classified in class 347, subclass 68.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the ink-jet head can be made by another and materially different process. For example, instead of forming the electrodes by sintering conductive pastes, the electrodes could be formed by sputtering.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Pam Denton on 2/22/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2861
